3. After installation of the unit(s), FRECC guarantees a minimum of ten (10) hours off-peak storage availability per day during the Seven (7) month heating season of October through April for ten (10) years from the date of installation.
4. FRECC further guarantees, subject to the approval of the Public Service Commission, that the rate for energy used by off-peak ETS unit(s) shall be discounted no less than forty percent (40%) below the lowest cost rate block for regular residential or small commercial services, as appropriate, and as modified and approved from time to time by the Public Service Commission, for ten (10) years from date of installation.
